For over 15 years I've been architecting and scaling distributed systems — high-throughput messaging platforms, exactly-once data pipelines and API gateways that serve millions of requests a day. Modern AI tooling gives me leverage on execution — the architectural calls and the quality bar stay human.

SKILLS

Languages

Go TypeScript / Node.js Python PHP SQL

Backend & Queues

Django / DRF Flask Celery Koa BullMQ Async Chi / Echo REST APIs WebSockets

Data

PostgreSQL MySQL MongoDB Redis Elasticsearch Snowflake

Infra & Frontend

AWS (ECS, Lambda, RDS) Terraform Docker GitHub Actions Linux React / Redux Next.js

HIGHLIGHTED WORK

SMS Delivery Platform

Go

Multi-tenant, 400K+ msgs/day, six providers, duplicate-free, compliant, fault-tolerant.

Central Data Pipeline

Node.js

20+ apps into Snowflake, 60+ event types, exactly-once, flat memory.

Real-Time Campaign Analytics

TypeScript / React

5-year full-stack platform; concurrent fault-tolerant ingestion, live dashboards.

Custom Background-Worker Framework

Python

Plugin workers with DI, centralized error handling, graceful shutdown; ~20 production workers.

Marketing Analytics Data Platform

Go / Node.js

Real-time click ingestion enriched with ad-spend across search, social and push networks; ROI attribution into Snowflake.

University Exam & Result System

Django

Solo-owned, 9 years in production; custom academic rules engine, GPA computation, audit logs.

E-Commerce SaaS

Next.js

Shopify-like multi-tenant platform; sandboxed theme engine, build pipeline, Terraform AWS infra.

EXPERIENCE

Senior Full Stack Software Engineer · Local Staffing LLC

Jul 2015 - Present · 11 yrs

High-throughput systems serving 3.5M+ requests and 400K+ messages a day: email & SMS platforms, exactly-once data pipelines, API gateways and analytics, across Python, Node.js and Go. Own architecture end to end; lead frontend where needed.

Past Roles

Senior Python Developer, Backend · Durlov 2016–2018. Mobile-app backends: DRF APIs, Celery jobs, realtime chat over WebSocket (Django Channels); managed AWS EC2.

Lead Developer · Transcendio 2014–2015. Led the web team building products on Django / Laravel with an AngularJS frontend.

Web Application Developer · Vitzo.com 2012–2015. PHP / CodeIgniter with heavy jQuery; Google Apps automation, browser extensions, a Python/Tornado realtime chat app.

Python / Django Developer · AirCourts 2013–2014. Web app for a Portugal-based sports-booking startup (Django + DRF, AngularJS).

Software Engineer / Product Co-ordinator · okdo.it / Tasawr 2012–2013. SaaS on Zend Framework + AngularJS; translated business requirements into JIRA issues.

Software Engineer · Leevio 2009–2012. Web apps in PHP and Python; mobile apps with PhoneGap and Titanium.

Community: Co-founder, Python Bangladesh (country's largest Python user group) · Founder, NodeSchool Khulna · Hundreds of technical deep-dives at masnun.com & masnun.rocks
